THE ADVANTAGES *of the* METAL CEILING

HEN the Wunderlich business was inaugurated 32 years ago, it was recognised that the Metal Ceiling was a product possessing outstanding advantages.

The ever increasing popularity of the Metal Ceiling in the following years testifies to the judgment and foresight of the firm. Wunderlich Metal Ceilings owe their success to three features: the unusual beauty of their designs; their practical advantage; and the economy they effect.

At the outset the Firm realized the success of the metal ceiling depended on its attractive appearance. This type of ceiling was new, prejudice to be overcome; consequently neither time, nor money, was spared to make it distinctive. The most experienced designers were secured. Only designs that would build prestige for the industry on the solid foundation of excellence were permitted to pass inspection.

To-day the range of such designs has grown to enormous proportions and includes many for every purpose, from delicate tracery for the drawing room, to bold and elaborate ornamentation for theatre or public hall.

The value of the Metal Ceiling is further enhanced by its decorative possibilities. It is not limited to one colour for its effects. A valuable feature is the fact that it is possible to pick out ornamental elements in contrasting tints. Obviously, the combinations made possible by this treatment are endless and greatly add to the distinctive beauty of the room.

The practical advantages of metal for ceilings are no less striking. The usual weaknesses that after a few years ruin the appearance of ceilings are eliminated when Wunderlich Metal Ceilings are used.

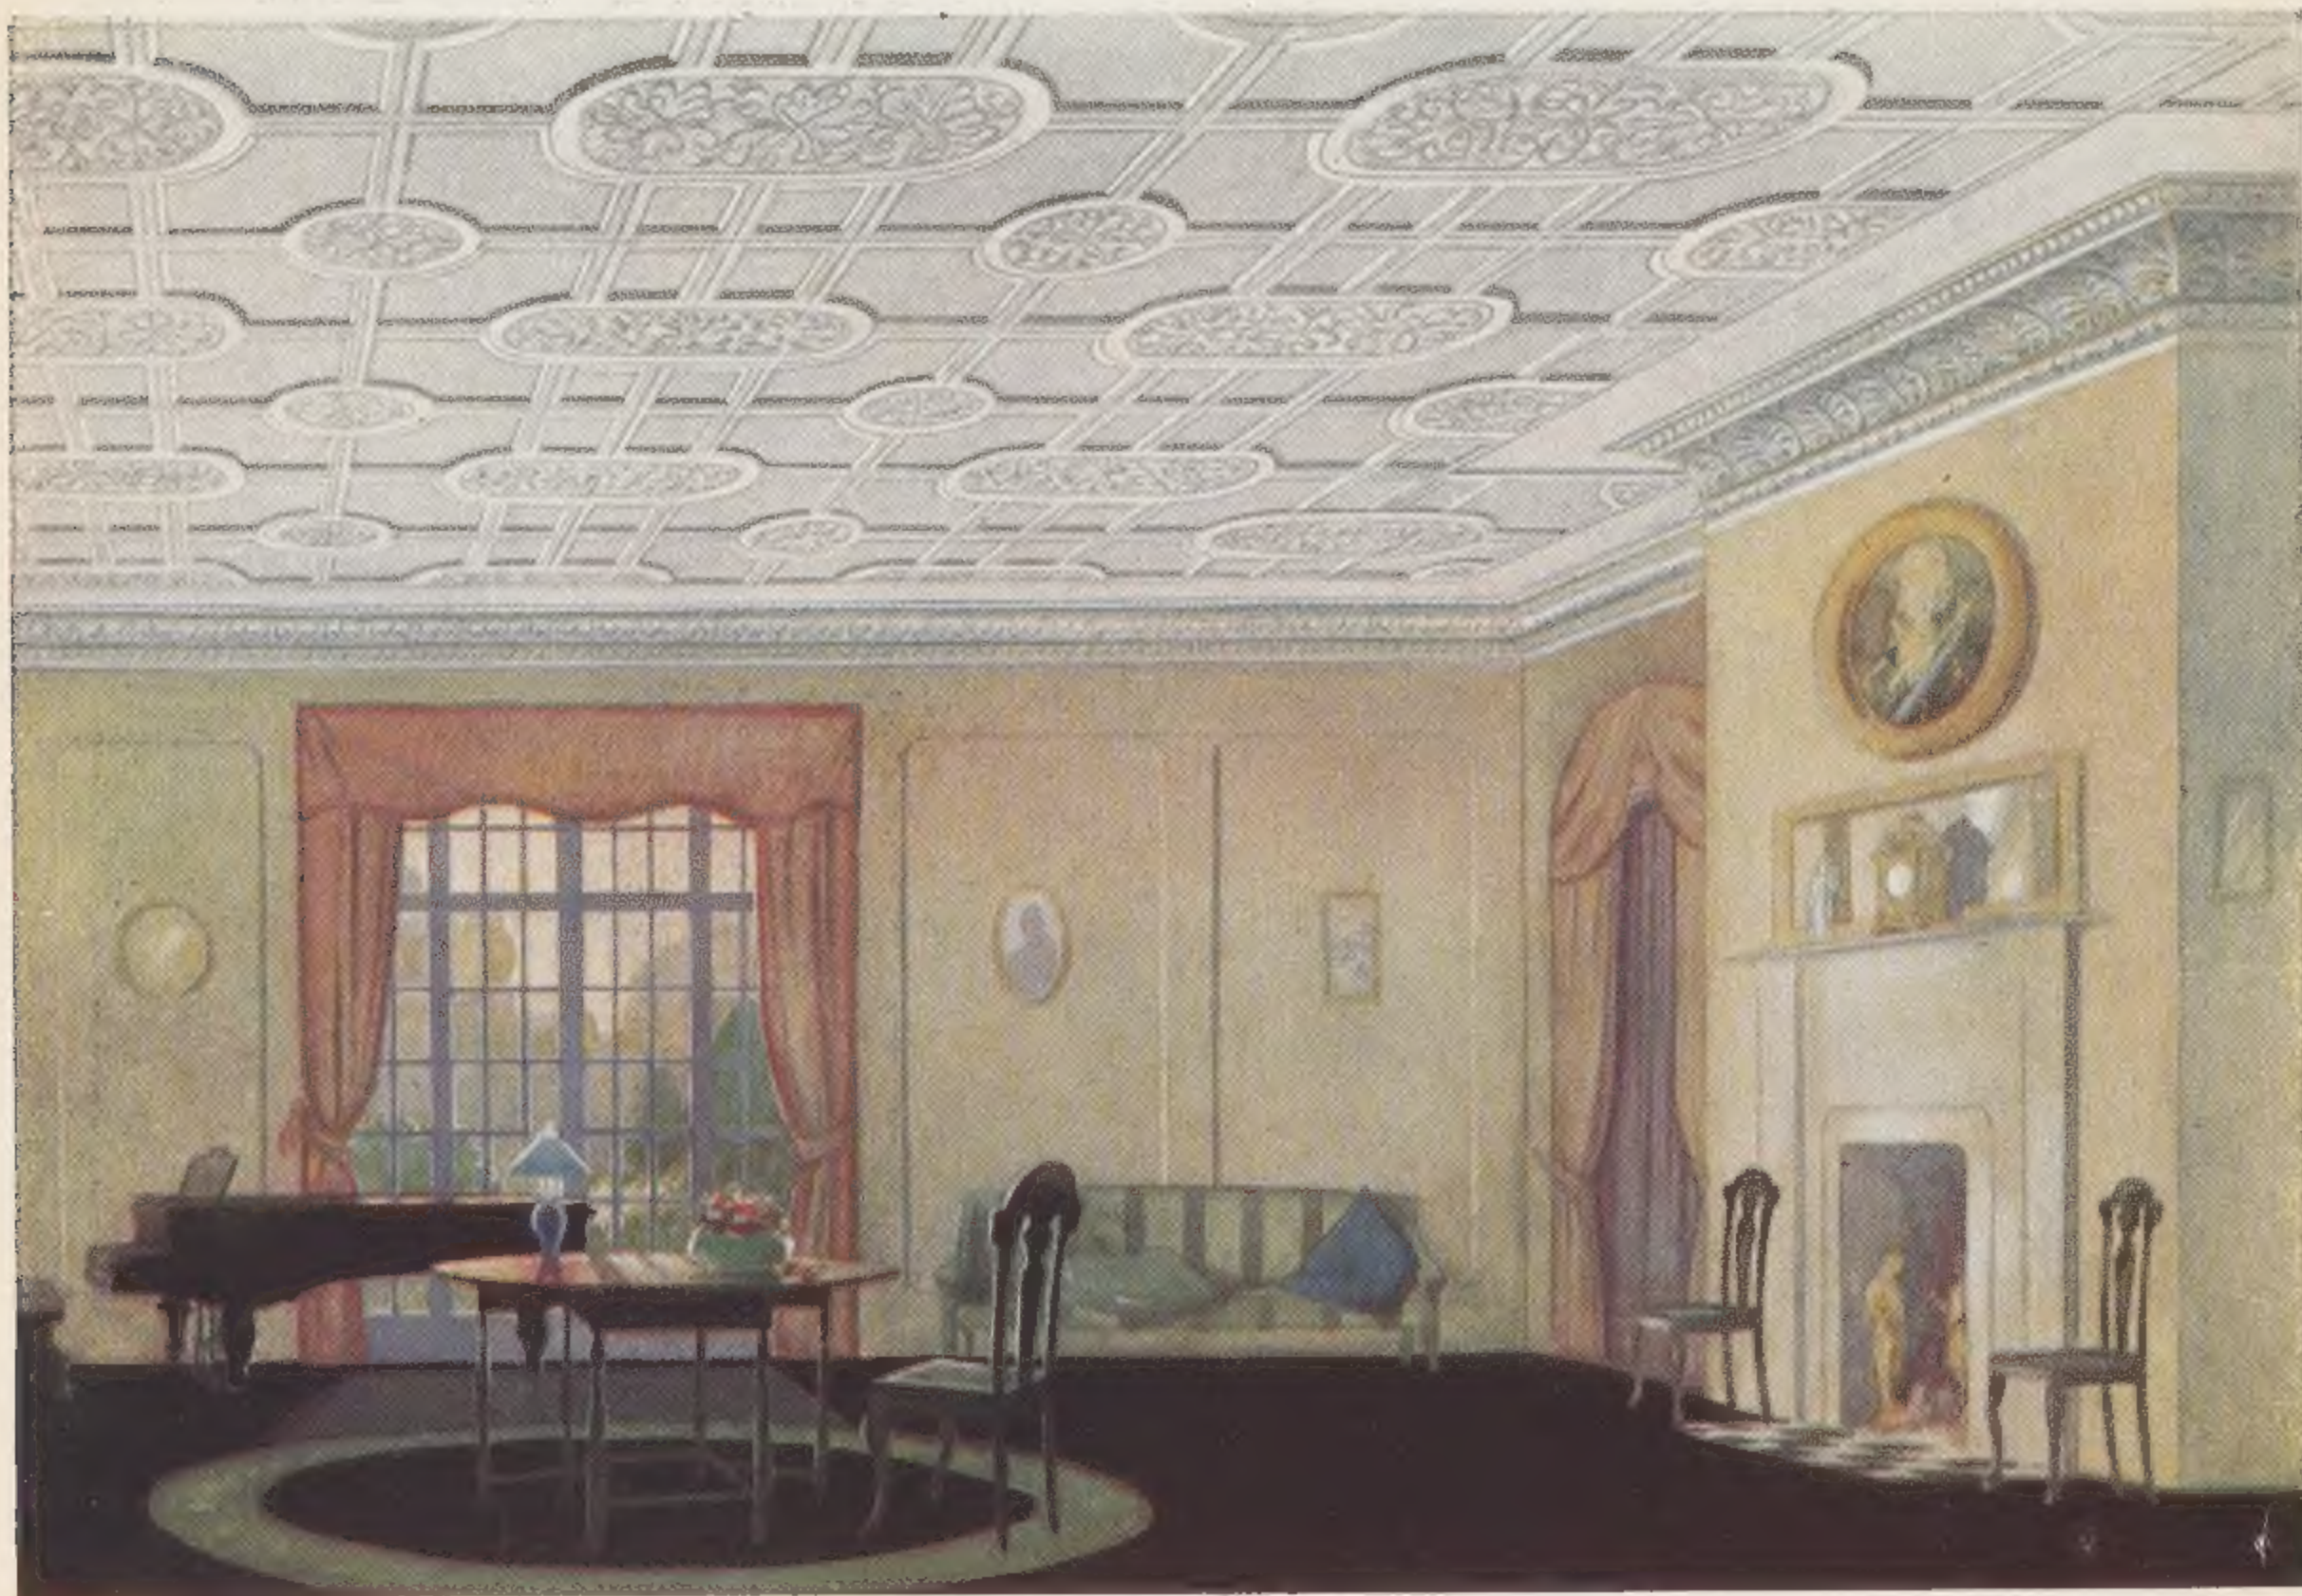

In their nature they cannot crack or warp, their surface is proof against water stains. Indeed, such ceilings can, and should, be washed with soap and water when necessary—a process that completely restores their initial freshness and beauty.

Borers have no effect on them, while their fire-resisting properties have often been valuable aids in saving houses from destruction.

Finally, they are economical in use. They are light, very compact when crated, and cost little for freight. Their erection is a quick and simple matter—a feature that effects substantial savings in the labour bill, while the fact that owners also enjoy positive freedom from repairs, not only eliminates unnecessary expense but ensures the permanent beauty of the ceiling.

Wunderlich Metal Ceilings

No. 991

ONE GREAT ADVANTAGE of Wunderlich Metal Ceilings is that they are suitable for every room in the house, the wide range of patterns making this possible. Great economy is effected in transport and labour costs : half a ton of Wunderlich Ceiling material covers 2160 square feet.

THE cleanliness and utility of the kitchen are well expressed in the simple ceiling design shown above. Wunderlich Metal Ceilings are hygienic, they do not collect dust, can be easily cleaned with a little soap and water when necessary, and are not subject to the undermining influences of insects and borers.
